

The safe and fast way to seal roof penetrations

All roof penetrations such as

- outlet vents
- ventilation systems
- anchor points, etc.

must be permanently sealed.

With us, you can rely on the right partner
for sealing materials.

Soba sealing collar
The original from Switzerland

Rely on our expertise

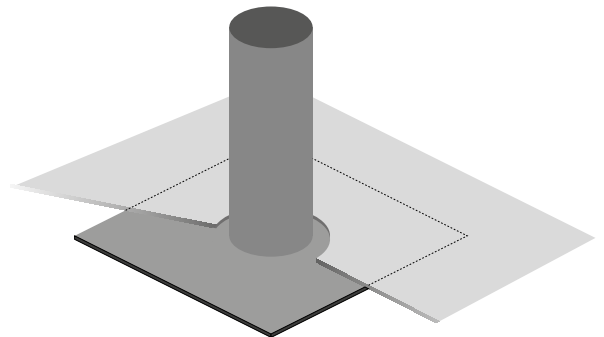

Soba sealing collars are made of high-quality synthetic rubbers. Developed in-house, the materials have been tailored to the respective requirements. Using a flame, the flange part is flame-sealed between the two-layer bituminous seal in a sandwich-type construction and forms a permanent seal. The top is closed in the conventional way (ventilation cap, etc.) depending on the type of roof penetration point.

Our promise to you

- No condensate as the collar fits snugly against the pipe
- Force-fit connection to the seal membrane
- No shielding required
- Vapor barrier is undamaged as mechanical fastening is dispensed with
- Pipe part made of weather-resistant EPDM
- Custom-made products depending on the project – angular, round or double flange enclosures

Your benefits

- Quick installation
- Easy to use
- Durable
- Swiss-made

**If absolutely leak-tight
seals are required,
then we are your perfect
partner.**

We would be happy to advise you
in person.

**Discover how easy installation
is in our video.**
